

VANGUARD IN A NUTSHELL

OUR CORE PURPOSE

To take a stand for all investors, to treat them fairly and to give them the best chance for investment success

A different kind of investment company

Vanguard is an investment company unlike any other. It was founded in the United States in 1975 on a simple but revolutionary idea: that an investment company should manage its funds solely in the interests of its clients. We have stood for low-cost, uncomplicated investing ever since. In 1976, Vanguard pioneered the concept of indexing, introducing the first index fund for individual investors in the United States.

Since then, we've been helping people reach their goals with low-cost, uncomplicated investments. This approach has earned us the trust of millions of investors and allowed us to become one of the world's largest investment management companies, with a presence in Europe, Australia and Asia as well as the Americas.

A unique ownership structure

Our unique mutual ownership structure in the US, where we are owned by our clients, means our interests are aligned with those of our investors globally. As a result, investors in Europe benefit from Vanguard's commitment to putting investors' interests first. Our structure underpins our core purpose, which is to take a stand for all investors, treat them fairly and give them the best chance for investment success.

How our ownership structure generates benefits for clients

We believe in giving investors access to broadly diversified, uncomplicated investments at the lowest possible cost - and we only offer products that meet the long-term needs of investors. It is a philosophy that has helped millions of people around the world to achieve their goals.
